LoadScan® Volume Scanner

DESCRIPTION	FEATURES
<p>Increase productivity and drive down costs - The LoadScan Load Volume Scanner is a non-contact, drive-through measurement for the volumetric measurement of bulk material truck loads.</p> <p>Fast, accurate payload measurement - LoadScan creates a 3D model or surface "profile". By comparing "empty" and "loaded" profiles LoadScan is able to calculate the load volume within 1%.</p>	<ul style="list-style-type: none">> Resolves disputes over quantities> Keeps accurate count of waste volume> Aids in correcting human error & preventing fraud> Decreases disposal costs versus conventional methods
