

STAGE 3

SEPARATION

**Solids Control
Experts**

**Slurry Processing &
Fluids Management**

ABOUT US

Onsite Waste & Fluids Separation systems for construction, drilling, industrial, municipal, and other fluids/slurry processing needs. Our fleet consists of >500 centrifuges, >200 shakers, >100 water filtration tanks, and an extensive array of purpose-built solids control equipment.

SERVICES

-  TBM Slurry Management
-  Ground Enhancement
-  Wastewater Treatment
-  Dredging Waste Dewatering

Redefining Solids Control & Slurry Treatment with Advanced Solutions & Superior Client Service

Stage 3 Separation is North America's largest dedicated solids control and fluids separation company.

Expertise in Tunnelling Spoils Waste Management

Mobile Slurry Treatment Systems

Treating backflow spoils in real-time on site, producing a dry stackable solid and clean water, thus reducing project disposal costs.

Bentonite & Polymer Fluids Management

Removing solid waste while maintaining optimal fluid properties to be reused in the TBM operations.

Deep Foundations

We process even the most challenging slurries including Jet Grout, Slurry Walls, Shafts, and Piling spoils.

Past Tunnelling Projects:

Annacis Island Outfall Tunnel

Vancouver, BC (Traylor/Aecon)
Micro-TBM Slurry Treatment

Valley Line LRT

Edmonton, AB (Shanghai Construction)
TBM Slurry Treatment

HRBT South & North Island

Virginia (HRCP Vinci/Dragados)
Jet Grout spoils processing

Eglinton Subway Expansion

Toronto, ON (Aecon/Dragados & Crosslinx)
Ground Enhancement spoils treatment

Second Narrows Utility Tunnel

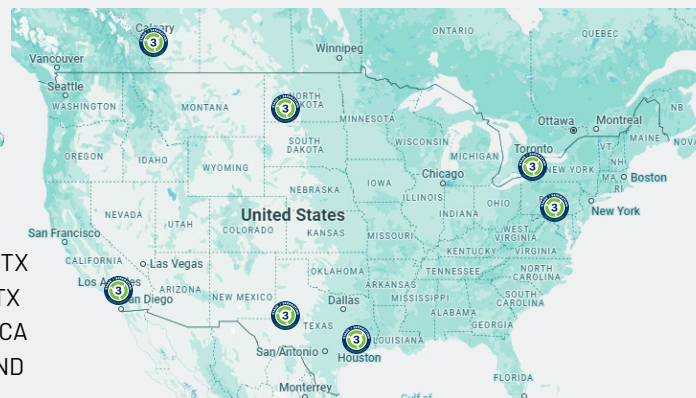

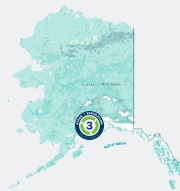

Vancouver, BC (Aecon/Traylor)
TBM Slurry Treatment

Athabasca River Crossing HDD

LONGEST RIVER CROSSING IN N. AMERICA
HDD Bentonite mud processing

Facility Locations and Area of Operations

- Calgary, AB
- Toronto, ON
- Smithfield, PA
- Kenai, AK
- Houston, TX
- Midland, TX
- Fontana, CA
- Mandan, ND
